The County of Ventura, as sponsor of Camarillo Airport, intends to relocate the airport’s beacon and reconstruct the pavement of Runway 8-26 and its taxiway connectors. The Camarillo Airport is located within a 500-year floodplain. The affected floodplain’s beneficial values include flood water storage and conveyance.

Since the county is seeking Federal Aviation Administration (FAA) funding and/or approval of federal actions occurring in a 500-year floodplain, a public notice and opportunity for comment is being provided. The public may submit comments on the proposed projects and their potential effects on the 500-year floodplain for a period of 30 days following the publication of this notice. You may obtain more information or send comments to Erin Powers, Projects Administrator at erin.powers@ventura.org. FAA will consider all comments received during the 30-day comment period before making an environmental determination.

Before including your address, phone number, e-mail address, or other personal identifying information in your comment, be advised that your entire comment—including your personal identifying information—may be made publicly available.
